Professional Summary

Emerging Software Developer and recent Computer Science graduate with hands-on experience in JavaScript, React, Java and proficient in problem solving techniques and developing software solutions.

Skills

Programming Language: Java, JavaScript, TypeScript

Framework & Libraries: React, Redux, Shadcn, Spring, Microservices, Material UI, CI/CD

DB&DevOps: PostgreSQL, GraphQL, Redis, Apache Kafka, Elasticsearch, ElastiCache RedShift

Tech Skills & Others: Software Development, Web Development, Agile Development, Problem Solver, Software Principles, Analytics, Version Control, Git.

Employment History

Software Developer - Intern

Jul 2021 - Aug 2021

Tech Mahindra

- Integrated Restful APIs, improving data flow and team collaboration.
- Optimized frontend for multi-device performance, ensuring seamless user experience.
- Managed state with Redux and ensured code quality through Jest software testing.
- Supported Agile processes, contributing to software architecture robustness.
- Pioneered ReactJs UI enhancements, boosting retail DXP engagement by over 40%, Streamlined API integration, enhancing collaboration across team and optimizing data efficiency.

Projects

Klimate:

- Developed a responsive weather application using React and TypeScript, delivering real-time global weather data with advanced geolocation and UI capabilities.
- Crafted an intuitive interface using Shadcn UI and Tailwind CSS, implementing seamless dark mode and accessible design.
- Created interactive data visualizations using chart for representing various weather data during the day and robust API integration with comprehensive error handling.
- Implemented geolocation services to provide personalized local weather insights.

Paste:

- Developed a comprehensive client-side web application for sharing and managing code snippets using Vanilla JavaScript.
- Created an intuitive interface with full CRUD functionality for code snippets, enabling creation, copying, sharing, and deletion.
- Utilized browser's Local Storage API for efficient client-side data persistence and application state management.

Education

Master of Science, Information Technology,

Dec 2024

University of the Cumberland, Kentucky, USA

Bachelor of Technology, Information Technology,

May 2022

Sankalchand Patel University, Gujarat, India

Certifications

Introduction to Front-End Development

Nov 2024
